PROFILE

I am a passionate and dedicated web development learner who has already built responsive front-end websites using HTML, CSS, JavaScript, and Bootstrap, with projects publicly available on my GitHub portfolio. I am also familiar with Git/GitHub, have begun exploring back-end development with Node.js and Express.js, and I am eager to continue learning and growing toward becoming a full-stack developer. With grit, persistence, and a strong willingness to learn, I am committed to finishing every job I take on.
